

Can you find your mate?

By this sound, and this sound alone, you will know your mate:

tick-tick tick tick tick-tick zeep zeep zeep zeep

Listen carefully for it.

By this sound, and this sound alone, your mate will know you:

tick-tick tick-tick

When you think you have found your mate, make this call so your mate can recognise you. Don't let any creatures other than your mate get close.

Beware - the night is full of predators. If you move too noisily or too quickly, if you make your call too loudly or too often, they will eat you. If you are eaten, give this box and instructions to your predator.

Can you find your mate?
